Talkin' Turkey: Wild Turkeys	Elective	Vickie Markey-Tekely	Saturday	November 6	10 am - 12 pm

We are working on a variety of new electives that will be announced shortly, as well as some dates for group field work doing some surveying for citizen science projects on frogs, insects etc. We are also working to establish a joint day in a state park with master naturalists from other area chapters.

If you have not handed in your hours volunteer hours for 2009, please do so, both we and the DNR are greatly in need of a record of ALL the hours you put in on MN projects, DNR events, etc. As a reminder, the DNR uses those hours to justify applying for federal funds that support DNR programs. Please don't be reluctant to turn in your hours, and please don't under-estimate the true amount of work you contribute.
